
Ragnarok Auto Potion is a great project for those of you who want some assistance with potions! This plugin allows players to pre-fill their inventory with potions and food while some other features allow you to limit what a player can consume. These helpful features will make playing a lot less frustrating and more enjoyable. This plugin has been created by JodlstienX, the developer of several popular plugins such as Player Head Count, Server Control, and Player Head Count Extended. This plugin has been tested and works as intended. Some features may be considered as "buggy" as JodlstienX is still new to the development of plugins and wants everyone's feedback on the player's experience. Features should be considered as a beta feature. This plugin should work with all servers which support Bukkit 1.8, 1.8-R2, 1.7. 10. This plugin requires a server with "No Cheats" in the gamemodes section, and "No Game-Bots" in the server settings.
